I am so grateful to the staff at Lancaster dental. They are amazing. I have been going there most of my life and recommend them to everyone! I have had alot of dental issues and they have helped me through every single one of them. I was just there again with a big problem and being pregnant I thought all hope was lost, they fixed me up and I went from tears to smiles. Thanks Lancaster Dental!

Everyone is very pleasant and professional. I never has issues with scheduling an appointment. My dental hygienist Julia is lovely and makes it easy to talk about your needs and is gentle. They also do everything they can go work within your benefits or budget.

I went in for a cleaning and they have a new dentist, Dr. Thamara, who was so kind. She took her time to speak to me and was very knowledgeable with anything I needed. 10/10 recommend.

The office is located on the second floor and very clean and organized. The office practiced proper Covid protocols and made me feel safe during my hygiene and dental appointment. The staff were friendly nice. Of course you couldn't see their smiles behind the mask but the eyes says it all. Alysia Kavanagh is the best Hygienist that's ever cleaned my teeth. She is very thorough and provides the best experience to her patients and always provides little golden nuggets of knowledge in hygiene, dentistry, investment, or in everyday life with no extra charge. Great soul and vibe. Dr. Tamara Marchini-Obregon was descriptive with her work, she explained her procedures and was very gentle with her hands. Great soul. I highly recommend this office for your hygiene and dental work. Drive slower as you approach the building or you might miss the entrance to the parking space.

All of the staff from reception, hygienist and the dentist are so friendly and helpful. The dentist treats my children as her own. I would highly recommend to anyone especially those with children.

I have been a patient at Lancaster Dental for several years. I find everyone to be welcoming from the minute I walk in the door. Each and every one of the staff are very friendly, helpful and professional. I get very nervous whenever I have to have work done and I'm impressed with how hard everyone works to make my experience the best that it can be. Thanks to everyone at Lancaster Dental for taking such good care of me. I wouldn't think of going anywhere else.

I have had a crack in my bottom tooth for the past 2.5 years. I had seen 2 other dentists and was told there was no problem with that area and that there wasn't anything displaying on the x-ray. DR. Upma took extra time and did additional tests and found the crack. After further investigation she sent me to a specialist to see if the tooth would be salvagable. He was able to determin that the tooth had been infected for quite awhile and it may be saved with a root canal and a crown. The root canal was completed that day and I immediately felt relief in that area. A big thank you to DR. Upma and the Lancaster Dental team for all the support and lessening my discomfort.

Been getting my teeth cleaned at other places and it was always very uncomfortable. My experience here was fantastic! Very professional office, friendly, comforting and well organized. Alysia the hygienist was great - by far the best experience I have had a dental office - no discomfort and very satisfied with the cleaning. Highly recommend this office!

My first dentist was a man. I was 5 years old. And so was my second, third, fourth and all the many dentists since then until yesterday.

When contemplating career choices I did not ever consider dentistry - as it was obviously in the category of men only like truck drivers and airline pilots at the time.

So yesterday was a first for me in all of my 80+ years!!! Small delicate hands in my mouth for one hour and at no time did I get the urge to bite down hard. A unique experience and one that will continue if I get my wish. Now I can encourage all girls to consider dentistry as a valid and appreciated career choice.

Many thanks lady dentist. For the first time in my life I can honestly look forward to my next appointment!!!
